 Security Notes

- Admin password is hardcoded in server.ts — changing it requires editing the server file directly.
- Technician accounts can only be created by Admin inside the Admin Dashboard.
- Customer accounts are self-registered via the /signup page only.
- All passwords are Bcrypt hashed (salt rounds: 10) in database.json.
- Blocked users are rejected in real-time on every API request via JWT middleware.
- CREDENTIALS.md and database.json are excluded from GitHub via .gitignore.

 Changelog

DATE

CHANGE

Jun 28, 2026	Fixed all login issues — reset all passwords and statuses to ACTIVE
Jun 28, 2026	Added Vercel Speed Insights integration
Jun 28, 2026	Removed unused @google/genai dependency (eliminated build warning)
Jun 28, 2026	Cleaned up duplicate files and folders from project
Jun 28, 2026	Initial project setup and GitHub push
